# pps{CyberTacticsFest}

ppsCyberTacticsFest@pghschools.org

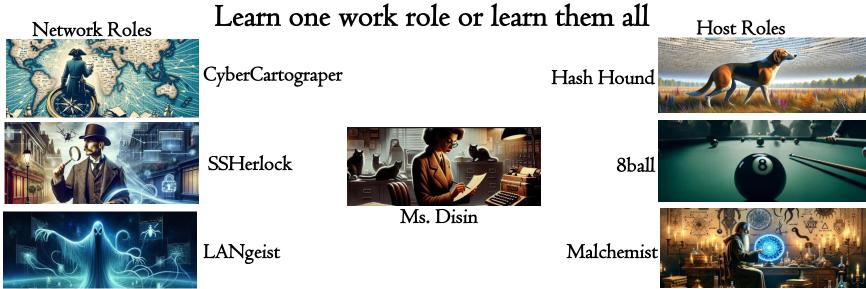

VS

Cyber Defenders — Confidentiality, Integrity, Availability
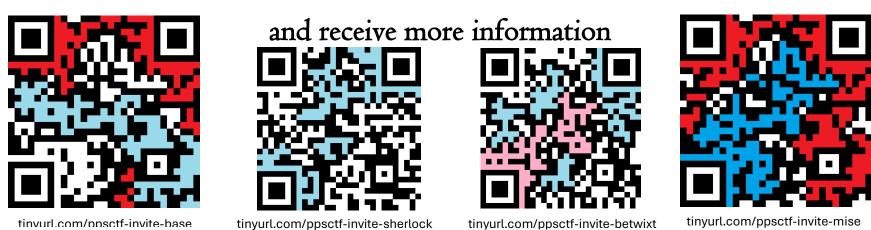

Hackers — Disclosure, Destruction, Denial

The PPS Cyber Tactics Fest aims to immerse students in realistic cybersecurity scenarios. Aligning with the MITRE ATT&CK framework and leveraging skills aligned with Carnegie Mellon University's PicoCTF and Cyber.org, this unique version of adversarial CFT will give real-world and hands-on skills with the incentives that only competition and gamification can provide.

## Learn one work role or learn them all

### Network Roles

 CyberCartograper

 SSHerlock

 LANgeist

Ms. Disin

### Host Roles

 Hash Hound

 8ball

 Malchemist

Use what you learned to attack and defend networks

## Accept one of these challenges to show an interest in participating and receive more information

Season starts second semester 1-2 sessions per week, individual and team challenges, culminating tournament

Whether you want cybersecurity as a career, a position to help work through college, or want to learn how hackers think, this competition will give you the tools, methods, and mindset to compete in a field that touches every aspect of life.

Where would you offense?

How would you defense?
